

OSSTEM MASTER COURSE BASIC COURSE

The Osstem Master Course

The course is designed to offer a comprehensive and advanced curriculum, ensuring participants gain in-depth knowledge and hands-on experience with the latest techniques, technologies, and advancements in the dental industry. The Osstem Master Course emphasizes practical, hands-on training, allowing participants to apply theoretical knowledge in a real-world clinical setting. This approach enhances skill development and confidence in implementing learned techniques.

**Comprehensive
hands-on**

special deals**

**Live Surgery
Experience**

1 What's Live Surgery?

For an exclusive supplement of \$1,000, you gain access to a comprehensive package encompassing essential surgical components, instruments, and consumables required for the seamless placement of a single implant in your patient. Surgery slots are allocated on a first-come, first-served basis, with your schedule finalized 7-10 days ahead of the designated surgery date. To partake in the Live Surgery experience, kindly choose and furnish pertinent case details for thorough evaluation by our esteemed course directors.

2 What you'll takeaway

This comprehensive course introduces dental implant treatment with a focus on patient assessment and treatment planning. Over 2 modules, attendees will learn the fundamentals to assess patients for implant treatment, how to plan the case using a restoratively-driven approach, surgical procedures involved in single teeth and short-span bridgework cases as well as how these cases can be restored. Hands-on exercises are designed to build confidence in understanding the surgical site and implant placement & positioning so the attendee can transfer these skills in a live surgery involving their own patient.

Module 1

- Day 1** Implant basics and Choosing an implant system
Patient evaluation, Patient case selection and consent
Radiographic guides, Imaging and Interpreting 3D scans
